

## Login con ReCaptcha.

## Implementando ReCaptcha.

```

27 ngOnInit(): void {}
28
29 onLogin() {
30   this.recaptchaV3Service.execute('importantAction').subscribe((token: string)=>{
31     this.tokenVisible= true;
32     this.reCAPCHAToken= `Token [${token}] generated`
33
34     console.log(this.reCAPCHAToken);
35     // localStorage.setItem('usuario', this.loginForm.value.username!);
36     // this.router.navigate(['/home']);
37   })
38 }
39 }
40

```

## Token en pantalla.
