

No es necesario crear el gitignore ya que angular te lo crea

```
.gitignore
9  # Node
10 /node_modules
11 npm-debug.log
12 yarn-error.log
13
14 # IDEs and editors
15 .idea/
16 .project
17 .classpath
18 .c9/
19 *.launch
20 .settings/
21 *.sublime-workspace
22
23 # Visual Studio Code
24 .vscode/*
25 !.vscode/settings.json
26 !.vscode/tasks.json
27 !.vscode/launch.json
28 !.vscode/extensions.json
29 .history/*
30
31 # Miscellaneous
32 /.angular/cache
33 .sass-cache/
34 /connect.lock
35 /coverage
36 /libpeerconnection.log
37 testem.log
38 /typings
39
40 # System files
41 .DS_Store
42 Thumbs.db
43
44 *.exe | You, 1 second ago * Uncommitted changes
45
```

git branch development

git checkout main

git merge develop

Git init

Git add .

Git commit -m "Login"

Git remote add <https://github.com/JulioJohan/prac03-web-integral.git>

Git push origin main

Git status
