

Práctica 03 Manejo de repositorios remotos

Link GitHub: <https://github.com/maramendoza692/prac03-web-integral.git>

Link StackBlitz: <https://stackblitz.com/edit/stackblitz-starters-ywloto?file=index.js>

- Crear un repositorio en tu cuenta personal de GitHub
 - Nombrarlo como **prac03-web integral**
 - Agregar una breve descripción
 - Definir accesibilidad pública

The screenshot shows the GitHub 'Create a new repository' page. The title is 'Create a new repository'. Below it, a subtitle says 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. The form has two main sections: 'Owner *' and 'Repository name *'. The 'Owner *' section has a dropdown menu showing 'maramendoza692' with a green plus icon. The 'Repository name *' section has a text input field containing 'prac03-web integral'. Below these fields, a warning message says '⚠ Your new repository will be created as prac03-web-integral.' Below the warning, a text says 'Great repository names are short and memorable. Need inspiration? How about [refactored-journey?](#)'. The 'Description (optional)' section has a text input field containing 'Práctica de manejo de repositorios remotos.' Below the description field, there are two radio button options: 'Public' (selected) and 'Private'. The 'Public' option has a description: 'Anyone on the internet can see this repository. You choose who can commit.' The 'Private' option has a description: 'You choose who can see and commit to this repository.'

- Ubicar la carpeta de la aplicación login creada en la unidad 1
 - Inicializa la carpeta en dado caso que no lo esté con **git** o **git flow**
 - Crear o modificar el archivo .gitignore de tal manera que no se suba la carpeta node-modules y todos los archivos *.exe
 - Agregar todos los archivos de la aplicación al Staging Area
 - Compromete los cambios.

```

```

- Realiza el merge o fusión de la rama develop a la rama main
- Crear un enlace o URL hacia el repositorio remoto GitHub recién creado.

```

PS D:\Documentos\Noveno\Desarrollo Web Integral\PracticaLogin> git remote add origin https://github.com/maramendoza692/prac03-web-integral.git

```

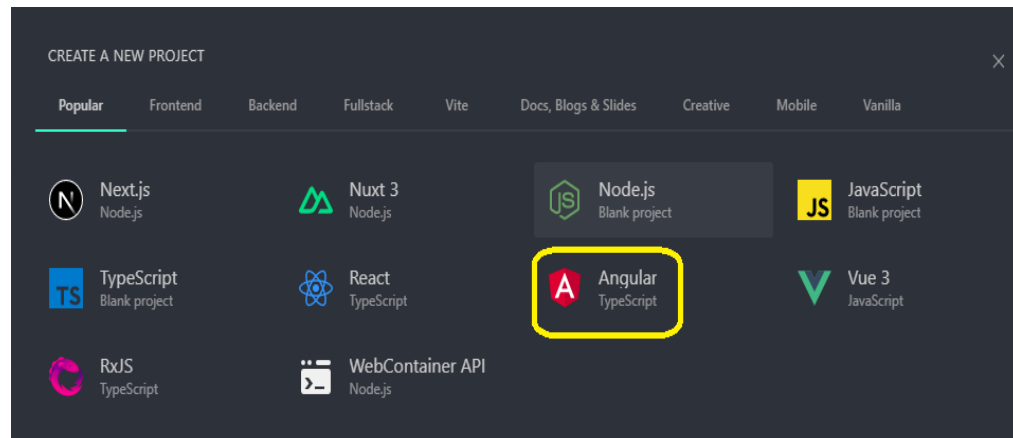

- Enviar los cambios a rama main del repositorio remoto

```

PS D:\Documentos\Noveno\Desarrollo Web Integral\PracticaLogin> git push origin master

* [new branch]      master -> master

```

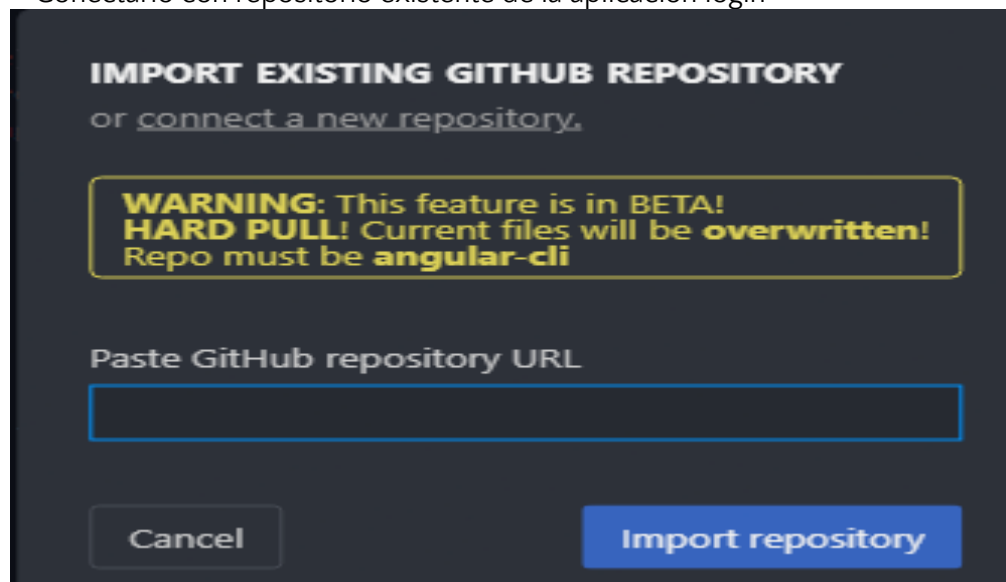

- Verificar qué se hayan dado
- Ingresar a la página StackBlitz
 - Registrar con cuenta personal de GitHub
 - Crear un nuevo proyecto Angular

- Conectar con el repositorio de github

- Conectarlo con repositorio existente de la aplicación login

- Modificar el archivo main.ts

```
import 'zone.js'
import { platformBrowserDynamic } from '@angular/platform-browser-dynamic';

import { AppModule } from './app/app.module';

platformBrowserDynamic().bootstrapModule(AppModule)
  .catch(err => console.error(err));
```

(alias) class AppModule
import AppModule
